

Session 11 Quiz - The Art of Prompting

Track A | Grades 5-8

Q1 [Type: MCQ | Difficulty: Easy | QID:57270]

Complete the sentence: A ____ is the instruction you give to an AI to tell it exactly what you want it to do.

- A. Code
- B. Prompt
- C. Script
- D. Dialogue

Correct Answer: B. Prompt

Explanation: A prompt is the input or set of instructions provided to an AI (like ChatGPT or Gemini) to generate a specific output. Code is programming language, script is a sequence of commands, and dialogue is a conversation, but the specific term for the instruction is prompt.

Q2 [Type: MCQ | Difficulty: Easy | QID:57272]

Complete the sentence: Thinking of AI as a ____ helps you remember to provide clear directions and context for success.

- A. Dictionary
- B. Search engine
- C. Calculator
- D. Coach

Correct Answer: D. Coach

Explanation: Using the analogy of a coach encourages the user to give specific directions and evaluate the team member's performance. A dictionary, search engine, or calculator does not capture the need for clear instruction and feedback.

Q3 [Type: MCQ | Difficulty: Easy | QID:57273]

Complete the sentence: Adding ____ to a prompt helps the AI understand the situation and who the information is for.

- A. Format
- B. Context
- C. Action
- D. Topic

Correct Answer: B. Context

Explanation: Context provides the background information, such as the intended audience or the specific situation, which refines the output. Format is about appearance, action is the verb, and topic is the subject matter.

Q4 [Type: MCQ | Difficulty: Easy | QID: 57274]

Complete the sentence: When you refine a prompt several times to improve the results, you are using the process of ____.

- A. Summarizing
- B. Repeating
- C. Iteration
- D. Drafting

Correct Answer: C. Iteration

Explanation: Iteration is the loop process of writing, testing, and improving a prompt until the desired result is achieved. Summarizing shortens text, repeating is doing the same thing again, and drafting is the first version.

Q5 [Type: MCQ | Difficulty: Easy | QID:57275]

Complete the sentence: A ____ is a personal toolkit where you save your best prompts to reuse them later.

- A. Prompt Library
- B. History Tab
- C. AI Decisions Diary
- D. Command Center

Correct Answer: A. Prompt Library

Explanation: A prompt library is a collection of successful prompts that serves as a resource for future tasks and learning. History tab shows past conversations, but a library is organized for reuse.

Q6 [Type: True/False | Difficulty: Easy | QID:57276]

True or False: To get a good result, you must include all 5 parts of the 'Magic Formula' in every prompt you write.

- A. False
- B. True

Correct Answer: A. False

Explanation: The material states you do not always need all five parts, though including more generally leads to better results. The statement says "must include all 5 parts," which is false.

Q7 [Type: True/False | Difficulty: Easy | QID:57277]

True or False: If an AI's first answer is not what you wanted, it is usually a sign that the AI is broken.

- A. True
- B. False

Correct Answer: B. False

Explanation: A poor initial response is often due to a vague prompt and can usually be fixed through the process of iteration. It does not mean the AI is broken.

Q8 [Type: True/False | Difficulty: Easy | QID:57278]

True or False: Asking the AI to do too many tasks at once, like writing a poem, a story, and a quiz in one prompt, can lead to poor results.

- A. False
- B. True

Correct Answer: B. True

Explanation: Overloading a single prompt is listed as one of the 5 Mistakes That Wreck Prompts because it can confuse the AI's focus and lead to poor or incomplete results.

Q9 [Type: True/False | Difficulty: Easy | QID:57279]

True or False: You should always verify the facts provided by an AI because it can sometimes give incorrect information.

- A. True
- B. False

Correct Answer: A. True

Explanation: Fact checking is essential because AI can generate plausible sounding but false information (hallucinations). This is noted as "Not Checking" in the mistakes section.

Q10 [Type: True/False | Difficulty: Easy-Medium | QID:57280]

True or False: The 'Action' part of a prompt is where you tell the AI the subject or topic it should write about.

- A. True
- B. False

Correct Answer: B. False

Explanation: The Action describes what the AI should do (like "write" or "list"), while the Topic describes what it is about. They are different parts.

Q11 [Type: MCQ | Difficulty: Easy-Medium | QID:57281]

Which part of a prompt defines the visual structure of the AI's response, such as a numbered list or a three-sentence paragraph?

- A. Context
- B. Topic
- C. Constraint
- D. Format

Correct Answer: D. Format

Explanation: Format dictates how the final output should look and how the information should be organized on the page, such as a numbered list, bullet points, or paragraph length.

Q12 [Type: MCQ | Difficulty: Easy | QID:57282]

If you give an AI the prompt 'Tell me stuff about animals,' which common mistake are you making?

- A. Including too much at once
- B. Not iterating
- C. Being too vague
- D. Not checking facts

Correct Answer: C. Being too vague

Explanation: The prompt lacks a specific topic or action, leaving the AI with too many choices on what to output. "Stuff" and "animals" are not specific, so it is vague.

Q13 [Type: MCQ | Difficulty: Easy-Medium | QID:57284]

What is a 'Constraint' in the 5-part magic formula for prompting?

- A. A limit or rule for the AI to follow
- B. The main verb telling the AI what to do
- C. A list of examples provided to the AI
- D. The background information about the audience

Correct Answer: A. A limit or rule for the AI to follow

Explanation: Constraints define boundaries like length, tone, or specific words to avoid. They make the output more precise. Background is context, main verb is action, examples are not a standard part.

Q14 [Type: MCQ | Difficulty: Easy-Medium | QID:57285]

In the prompt 'Write a 4-line, funny, rhyming poem about dogs for my 7-year-old sister,' which part represents the 'Context'?

- A. 4-line, funny, rhyming
- B. Dogs
- C. For my 7-year-old sister
- D. Write

Correct Answer: C. For my 7-year-old sister

Explanation: This describes the intended audience, which helps the AI adjust the vocabulary and tone to be appropriate. That is context. The action is "write," topic is "dogs," constraints are "4-line, funny, rhyming."

Q15 [Type: MCQ | Difficulty: Easy-Medium | QID:57286]

According to the 'Coach Idea,' how should you treat your interactions with AI?

- A. As a search engine for finding website links
- B. As a teammate who needs clear directions
- C. As a replacement for doing your own schoolwork
- D. As a magic box that knows everything automatically

Correct Answer: B. As a teammate who needs clear directions

Explanation: The Coach Idea encourages active guidance and refinement rather than just passive typing. AI is a teammate that benefits from clear instructions, not a magic box or a search engine.

Q16 [Type: MCQ | Difficulty: Medium | QID:57287]

Why is 'Iteration' described as the place where the 'magic happens' in prompting?

- A. It saves time by finishing the task in one try
- B. It automatically corrects any lies the AI tells
- C. It is the only way to make the AI work at all
- D. It allows you to fix mistakes and get closer to your goal

Correct Answer: D. It allows you to fix mistakes and get closer to your goal

Explanation: Rarely is the first prompt perfect; refining it based on the AI's response is the key to high quality results. Iteration is a loop of testing and improving.

Q17 [Type: MCQ | Difficulty: Easy-Medium | QID:57289]

What should you do if the AI provides a response that is much longer than you actually need?

- A. Add a length constraint like 'keep it under 3 sentences'
- B. Start over with a completely different topic
- C. Assume the AI is unable to write short responses
- D. Change the 'Action' verb to 'Summarize'

Correct Answer: A. Add a length constraint like 'keep it under 3 sentences'

Explanation: Constraints are the specific tool used to limit the scope or length of an AI's output. Adding a length constraint directly addresses the problem.

Q18 [Type: MCQ | Difficulty: Medium | QID:57290]

In the Prompt Library template, why is the 'What I'd Change' section important?

- A. It tells the AI which parts of the response were wrong
- B. It helps you learn from mistakes for future prompts
- C. It is where you record the AI's final answer
- D. It is required by the AI tool to save the data

Correct Answer: B. It helps you learn from mistakes for future prompts

Explanation: Reflecting on how to improve a prompt ensures that you get even better results the next time you perform a similar task. It is about learning, not giving instructions to the AI.

Q19 [Type: MCQ | Difficulty: Easy-Medium | QID:57291]

Which of the following is a 'Pro Tip' for becoming a great prompt engineer?

- A. Never use more than two parts of the Magic Formula
- B. Only use AI for tasks that don't matter
- C. Iterate 3-5 times before being happy with the result
- D. Always use the same prompt for every different task

Correct Answer: C. Iterate 3-5 times before being happy with the result

Explanation: The material notes that experts expect to refine their prompts multiple times rather than settling for the first try. Iteration is key to becoming a great prompt engineer.

Q20 [Type: MCQ | Difficulty: Easy-Medium | QID:57292]

What is the final step in the 'Prompt Playground' activity before saving to your library?

- A. Ask the AI to write its own prompt
- B. Improve the prompt and try again
- C. Accept the very first answer you get
- D. Delete the chat history

Correct Answer: B. Improve the prompt and try again

Explanation: Refinement is the final active step to ensure the prompt is "save worthy" and effective. You test, evaluate, improve, and then save to your library.
