

Session 19: AI Careers & The Future of Work

You've learned a lot about AI in the last 18 sessions. Today, we'll explore one big question: **How will AI change the future of jobs?**

Change Work?

Will AI change the way people work?

New Jobs?

Will AI create new kinds of jobs?

Help YOU?

Will AI help YOU do amazing things in the future?

Objectives

By the end of this session, you'll be able to:

01

Explain how AI is changing the world of work

02

Spot new jobs AI is creating

03

Know which skills matter for an AI-powered future

04

Build your own real app using Lovable - no coding needed!

05

Walk out with a clear picture of YOUR future with AI

Recap & Homework

Discuss

- Which adult did you talk to?
- Does their job use AI? In what ways?
- Were you surprised by what they said?

Quick Check from Last Session

- Name 3 industries that use AI today.
- What's the **Sense** → **Think** → **Act** recipe?
- **Human-in-the-Loop** - what does that mean?

Warm-Up - Your Dream Job

Take 30 seconds. Think about what YOU might want to be when you grow up. (Or - what's a job that sounds **COOL** to you?)

Artist

Chef

Astronaut

Athlete

Doctor

YouTuber

Game Designer

Vet

Teacher

Scientist

Engineer

Singer

Now ask: **How might AI change THAT job by the time you get there?**

AI Gives People New Superpowers

Think about superheroes. A superhero becomes stronger because they have special tools. **AI is like a super-tool.**

Work Faster

AI handles repetitive tasks at incredible speed, freeing you up for what matters.

Generate Ideas

AI can brainstorm hundreds of ideas in seconds to spark your creativity.

Find Patterns

AI spots hidden patterns in huge amounts of data that humans might miss.

Create Amazing Things

AI helps artists, designers, and builders make things that weren't possible before.

The future isn't humans vs AI. It's humans + AI.

AI in Everyday Jobs

AI is already helping people in many jobs today.

Chef + AI

AI suggests recipe ideas based on ingredients you have.

Chefs decide what **tastes good** and create the final dish.

Athlete + AI

AI analyzes game footage to spot patterns in performance.

Athletes and coaches decide what to **change in training**.

Architect + AI

AI generates building design options based on space and budget.

Architects choose what's **safe, beautiful, and right** for the people who'll use it.

NEW Jobs AI Created

Some jobs **DIDN'T EXIST** 10 years ago. Now they do. Most new AI jobs fit into **4 lanes**. Pick the one that sounds like YOU.

The Builders

Build the AI itself. AI Engineer, Machine Learning Engineer, Robotics Engineer

The Deciders

Figure out what AI should do. Data Scientist, AI Product Manager, Chief AI Officer

The Guardians

Keep AI safe, fair, and legal. AI Ethics Officer, AI Safety Researcher, AI Policy Advisor

The Empowered

Use AI to supercharge ANY career. AI-Powered Teacher, AI-Assisted Artist, AI-Augmented Doctor

You don't need to be an engineer to thrive with AI. **Every career can include AI.**

Mini Activity 1 - Pick a Job and Add AI!

Pick a career YOU'RE interested in. Now imagine adding AI. Try to come up with **2–3 jobs** and how AI might help each one.

Career	How might AI HELP this job?
 Vet (<i>Example</i>)	AI spots diseases in pet X-rays. Helps recommend treatment.
1. _____	
2. _____	
3. _____	

 Think about the job, then ask: What's the hardest or most time-consuming part? Could AI help with that?

Humans + AI: Better Together

AI is good at:

Analyzing lots of information

Working quickly

Humans are good at:

Understanding feelings

Being creative

Building friendships

Making fair decisions

Example: AI can suggest 50 different plot twists for your story. **You're the one who decides which twist actually makes the story good.**

The Future Needs Human Skills

Imagine you played two games - one made entirely by AI, and one made by a creative human using AI - but you didn't know which was which.

Game A

Made entirely by AI

Game B

Made by a human, using AI as a helper

Would you be able to tell which was which?

What might feel different even if you couldn't say exactly why?

① AI can generate ideas. Humans bring meaning, imagination, and purpose. The future needs both.

To succeed in this future, you need a few important skills...

The 5 Skills That Matter MOST

Whatever career you pick - these 5 skills will help you succeed in an AI world:

Critical Thinking

Questioning, evaluating, not just believing

Creativity

Coming up with original ideas

Communication

Explaining ideas clearly - to humans AND AI!

Problem-Solving

Breaking tricky situations into steps

AI Literacy

Using AI well - you're learning this RIGHT NOW!

Mini Activity 2 - Where Are You Strong?

Read each scenario. Which of the 5 skills is being used the **MOST**?

 Critical Thinking,  Creativity,  Communication,  Problem-Solving,  AI Literacy

#	Scenario	Primary Skill
1	A student learns a brand new AI video tool in one afternoon to finish a school project.	?
2	A game designer imagines a character no one has seen before - a clockwork dragon that breathes steam.	?
3	You ask AI for advice, then think: "Wait - is this actually a good idea for MY situation?"	?
4	You write a detailed prompt explaining EXACTLY what tone you want the AI to use.	?
5	Your group project is stuck. You break the big problem into 3 smaller steps and tackle them one by one.	?

Mini Activity 2 - Answers

#	Skill	Why
1	 AI Literacy	Learning a new AI tool fast = AI Literacy in action
2	 Creativity	Imagining something brand new - that's pure creativity
3	 Critical Thinking	Questioning AI's advice instead of just accepting it
4	 Communication	Explaining EXACTLY what you want - to AI or to a human
5	 Problem-Solving	Breaking a big problem into smaller steps

☑ These skills work **TOGETHER**. The best AI users combine all 5.

The Secret Skill For The Future

The future will keep changing. New inventions will appear.

New careers will appear. New tools will appear.

? What can I learn?

? What can I build?

? What can I try next?

Curiosity is a superpower.

In a few minutes, you're going to use that curiosity to build something that's never existed before - **your own app**.

i Curious people will learn faster and do better with AI.

Hands-On Activity Time - Build a Real App! 🚀

Now for the **BIG moment**.

Real App

You're going to build a REAL working app today.

No Coding

No coding. No experience needed. Just an idea.

Just Describe It

We'll use a tool called Lovable - it builds apps from your description.

📋 Ready? Let's go! 🚀

Build something Lovable

Create apps and websites by
chatting with AI

Ask Lovable to create a dashboard to...

Build ▾

Meet Lovable

Lovable is a no-code AI tool. You describe an app. It builds it.

Type What You Want

"Build me a homework tracker app"

Lovable Generates It

A real working website/app appears

Preview, Edit, Share

You can preview it, edit it, and share it

Plan Your App!

Before you type into Lovable, **plan your app**:

Question	Your Answer
 What's the app FOR?	
 Who uses it?	
 What can users DO?	
 What's the vibe?	

 Quick tip: Start **SIMPLE**. You can add features later.

App Ideas to Try

Stuck? Pick one of these - or invent your OWN!

Homework Tracker

A list of homework with due dates

Habit Builder

Track if you did your habits today

Trivia Game

Multiple-choice quiz with your favorite topic

Mood Journal

Log how you feel each day

Pet Care App

Track when your pet was fed, walked

Random Generator

Pick a random book, food, or game

Goal Tracker

Set a goal, track progress

Recipe Finder

Type ingredients, get a recipe

Write Your Prompt for Lovable

Now write your prompt.

The Template

"Build me a **[type of app]** for **[who]**. It should let users **[main actions]**. The design should be **[style]**."

Example Prompt

"Build me a **homework tracker app** for **5th grade students**. It should let users **add homework with subject, due date, and a checkbox**. The design should be **colorful and fun**."

Now write yours! Fill in each part of the template with YOUR app idea.

Hands-On - Generate Your App! 🚀

Now the magic:

Open lovable.dev

Click "New Project"

Paste Your Prompt

Click Generate

Wait a few minutes and Watch your app appear!

While it builds, think:

- What do you think it will look like?
- Will it work the way you described?

Test Your App!

The app is built! Now test it.

Does it work?

Try every button and feature.

Does it look right?

Is the design what you imagined?

What's missing?

What didn't make it in?

What would you add?

Dream bigger - what's next?

Ask Lovable to improve it! Try prompts like:

- "Make the buttons bigger and more colorful."
- "Add a way to mark tasks as 'done.'"
- "Change the font to be more fun."

 You just iterated on a real app - that's a core part of how software actually gets built.

Reflection - How Did That Feel?

🤔 What was surprising about building an app this way?

🤔 Did Lovable understand your prompt the first time?

🤔 What would you build NEXT?

✨ The Cool Side

Anyone can build apps now. You don't need a computer science degree.

⚠️ The Tricky Side

The apps still need ideas, design taste, and quality checks. That's where **YOU** come in.

📌 Lovable is the tool. YOU are the builder.

What We Learned in this Session

AI is changing every job

Not replacing most of them, but helping people work better.

The 4 Career Lanes

Builders · Deciders · Guardians · Empowered

The 5 Skills That Matter Most

Critical Thinking, Creativity, Communication, Problem-Solving, AI Literacy

The 3 Rules

AI is a tool · Work WITH AI · Keep learning

Curiosity is your superpower

Keep asking 'what can I learn, build, or try next?'

You built a real app within minutes - no coding!

Built and tested it - then made it better with a follow-up prompt.

Add to Your Prompt Library

Your New Prompt Template

"Build me a **[type of app]** for **[who]**. It should let users **[main actions]**. The design should be **[style]**."

Example

"Build me a homework tracker for 5th graders. It should let users add homework with a subject, due date, and checkbox. The design should be colorful and fun."

Why This Prompt Works:

App Blueprint

Forces you to define WHAT, WHO, HOW, and VIBE

Reusable

Use this for ANY app idea, forever

Designer's Eye

Includes the visual style, not just the function

Save this in your Prompt Library - your "**instant app builder**" template!

Your Homework - Pick Your Lane + Improve Your App

Part 1: Pick Your Lane - Builders, Deciders, Guardians, Empowered

My Lane

Which of the 4 lanes sounds most like you right now? Write it down:

One Reason It Sounds Like Me

What is it about that lane that fits your personality or interests?

The Skill I'd Need Most

Choose one: **Critical Thinking** · **Creativity** · **Communication** ·
Problem-Solving · **AI Literacy**

My pick: _____

Why That Skill Matters for My Lane

Explain in your own words why that skill is especially important for the lane you chose: _____

Part 2: Ask a family member or friend:

"If you could have ANY simple app, what would it do?" Then **build it for them.**

Next Time - Session 20:

AI Bias & Fairness

You've seen AI doing amazing things. But sometimes - **AI gets things WRONG in unfair ways.**

Why does AI sometimes work better for some people than others?

How does bias sneak into AI?

Real stories: when AI was unfair to real people

What can WE do to make AI more fair?
