

Session 19 Quiz - AI Careers & Future of Work

Track A | Grades 5-8

Q1 [Type: MCQ | Difficulty: Easy | QID:57519]

AI is often compared to a _____ because it gives people the ability to work faster and achieve more than they could alone.

- A. distraction
- B. super-tool
- C. replacement
- D. competitor

Correct Answer: B. super-tool

Explanation: AI functions as an enhancement to human capability, much like a powerful tool that provides new "superpowers" for productivity. It is not a distraction, replacement, or competitor; it is a tool that helps people achieve more.

Q2 [Type: MCQ | Difficulty: Easy | QID:57520]

In the future world of work, the most successful approach is described as humans _____ AI.

- A. ignoring
- B. versus
- C. plus
- D. replacing

Correct Answer: C. plus

Explanation: The core philosophy of the lesson is that humans and AI work together as a team (humans plus AI) to create better results. Ignoring, versus, and replacing all suggest opposition rather than partnership.

Q3 [Type: MCQ | Difficulty: Easy-Medium | QID:57521]

Someone who uses AI to enhance their work as a teacher or a doctor belongs in the _____ career lane.

- A. Empowered
- B. Deciders
- C. Guardians
- D. Builders

Correct Answer: A. Empowered

Explanation: The Empowered lane focuses on using AI to supercharge existing, non-engineering careers such as teaching, medicine, or law. Deciders set goals, Guardians ensure safety, and Builders create the AI itself.

Q4 [Type: MCQ | Difficulty: Easy-Medium | QID:57522]

The lesson describes _____ as a 'superpower' because it drives you to keep learning, building, and trying new things.

- A. coding
- B. curiosity
- C. speed
- D. obedience

Correct Answer: B. curiosity

Explanation: Curious people are identified as those who will learn faster and adapt better to a changing future. Curiosity is the drive to ask questions and explore, which is a superpower in an AI-powered world.

Q5 [Type: MCQ | Difficulty: Easy | QID:57523]

When using the tool Lovable, you can build a real app just by providing a _____.

- A. coding language
- B. credit card
- C. description
- D. mathematical formula

Correct Answer: C. description

Explanation: Lovable is a no-code tool that generates software based on a text prompt or description provided by the user. It does not require coding languages, credit cards, or math formulas to get started.

Q6 [Type: True/False | Difficulty: Easy | QID:57524]

True or False: To thrive in an AI-powered future, you must become an AI Engineer or a computer programmer.

- A. True
- B. False

Correct Answer: B. False

Explanation: The lesson explains that every career can include AI, and you do not need to be an engineer to succeed. There are four lanes (Empowered, Deciders, Guardians, Builders), and only one lane requires programming.

Q7 [Type: True/False | Difficulty: Easy | QID:57525]

True or False: AI is better than humans at understanding feelings and building friendships.

- A. True
- B. False

Correct Answer: B. False

Explanation: Understanding emotions, empathy, and social connection are specifically listed as things humans do better than AI. AI can simulate conversation but does not truly understand feelings.

Q8 [Type: True/False | Difficulty: Easy | QID:57526]

True or False: A 'Guardian' in an AI career path works to make sure AI is safe, fair, and legal.

- A. True
- B. False

Correct Answer: A. True

Explanation: Guardians include roles like Ethics Officers and Policy Advisors who protect users and society by ensuring AI systems are safe, fair, and comply with laws.

Q9 [Type: True/False | Difficulty: Easy-Medium | QID:57527]

True or False: When building an app with AI, it is best to start with a very complex plan and all possible features at once.

- A. True
- B. False

Correct Answer: B. False

Explanation: The material suggests starting simple and then adding features later through iteration. Complex plans from the start often lead to confusion and failure.

Q10 [Type: True/False | Difficulty: Easy-Medium | QID:57528]

True or False: Critical Thinking involves questioning AI advice rather than just accepting it as fact.

- A. True
- B. False

Correct Answer: A. True

Explanation: Critical thinking is defined as questioning, evaluating, and not just believing what you are told. With AI, this means verifying outputs and thinking for yourself.

Q11 [Type: MCQ | Difficulty: Easy-Medium | QID:57529]

Which skill is being used when a designer imagines a 'clockwork dragon that breathes steam'—something that has never been seen before?

- A. Creativity
- B. AI Literacy
- C. Communication
- D. Problem-Solving

Correct Answer: A. Creativity

Explanation: Coming up with original, brand-new ideas that do not exist yet is the definition of creativity. AI Literacy is using AI tools, Communication is expressing ideas, and Problem-Solving is breaking down challenges.

Q12 [Type: MCQ | Difficulty: Easy-Medium | QID:57530]

If you are 'breaking a big problem into 3 smaller steps and tackling them one by one,' which key skill are you using?

- A. Creativity
- B. Critical Thinking
- C. Communication
- D. Problem-Solving

Correct Answer: D. Problem-Solving

Explanation: Problem-solving is defined as the ability to break tricky situations down into manageable steps. Creativity generates new ideas, Critical Thinking evaluates, and Communication explains.

Q13 [Type: MCQ | Difficulty: Easy-Medium | QID:57531]

How does an architect use AI as a 'superpower' according to the source material?

- A. Automatically buying the land for the building
- B. Generating multiple design options based on budget and space
- C. Physically building the house with robot hands
- D. Replacing the need for safety checks

Correct Answer: B. Generating multiple design options based on budget and space

Explanation: AI can quickly create many variations, allowing the human architect to choose the best one. It does not buy land, build physically, or replace safety checks.

Q14 [Type: MCQ | Difficulty: Easy-Medium | QID:57532]

Which part of the app prompt template focuses on the 'vibe' or visual appearance of the application?

- A. App type
- B. Main actions
- C. Target audience
- D. Design style

Correct Answer: D. Design style

Explanation: The template includes "Design style" to define if the app should look colorful, fun, professional, or modern. That is the "vibe" or visual appearance.

Q15 [Type: MCQ | Difficulty: Easy-Medium | QID:57533]

What is the purpose of 'iterating' on an app after the AI generates the first version?

- A. To delete the app and start over from scratch
- B. To avoid having to test the buttons
- C. To let the AI decide the entire purpose of the app
- D. To improve and refine the app based on testing

Correct Answer: D. To improve and refine the app based on testing

Explanation: Iterating allows the builder to fix mistakes, add missing features, and make the design better. It is a process of continuous improvement, not deletion or avoidance.

Q16 [Type: MCQ | Difficulty: Medium | QID:57534]

Which of these is a human strength that AI currently struggles to replicate?

- A. Working 24 hours a day without getting tired
- B. Analyzing huge amounts of data in seconds
- C. Making fair decisions with meaning and purpose
- D. Identifying repetitive patterns in video footage

Correct Answer: C. Making fair decisions with meaning and purpose

Explanation: Humans bring meaning and imagination to choices, whereas AI simply follows patterns in data and can inherit biases. The other options are AI strengths, not human ones.

Q17 [Type: MCQ | Difficulty: Easy-Medium | QID:57535]

A student who uses a detailed prompt to explain EXACTLY what tone they want AI to use is demonstrating which skill?

- A. Communication
- B. Problem-Solving
- C. Creativity
- D. Critical Thinking

Correct Answer: A. Communication

Explanation: Communication involves explaining ideas clearly to both humans and AI models. Describing tone, style, and details is a key communication skill.

Q18 [Type: MCQ | Difficulty: Medium | QID:57536]

The 'Deciders' lane in AI careers is best described as people who:

- A. Argue about AI laws in a courtroom
- B. Use AI to help them paint a picture
- C. Figure out what the AI should actually do
- D. Fix the physical hardware of robots

Correct Answer: C. Figure out what the AI should actually do

Explanation: Deciders, like AI Product Managers and Data Scientists, set the goals and direction for how the technology is used. They decide what problem to solve and what success looks like.

Q19 [Type: MCQ | Difficulty: Easy-Medium | QID:57537]

When a chef uses AI to suggest recipes based on ingredients they already have, who makes the final decision on the dish's taste?

- A. The human chef
- B. The internet
- C. The AI software
- D. The grocery store

Correct Answer: A. The human chef

Explanation: The source material says AI suggests, but humans "decide what tastes good." The human chef makes the final decision and adds the personal touch.

Q20 [Type: MCQ | Difficulty: Easy-Medium | QID:57538]

Which skill is most involved when you quickly learn how to use a brand new AI video tool to finish a school project?

- A. AI Literacy
- B. Problem-Solving
- C. Creativity
- D. Communication

Correct Answer: A. AI Literacy

Explanation: AI Literacy is the specific ability to use and adapt to new AI tools effectively. Problem-solving, creativity, and communication are also important, but AI Literacy directly covers learning new AI tools.
