

Session 13: Prompting for Real Tasks

You've learned the basics. You've learned the pro techniques. Now it's time to **USE** them - for stuff you actually do every day.

- This Session, prompting becomes a **life skill**.

Objectives

By the end of this Session, you'll be able to use AI across every part of your life - creatively, responsibly, and effectively.

Creative

Stories, drawings, ideas

Everyday Tasks

Planning, organizing

Research

Finding and checking facts

Learning

Studying, explaining

Writing

Drafting, polishing

Responsible Use

Without cheating yourself

Recap & Homework

Welcome back! Let's see your 4-technique homework.

Easiest Technique?

Which one felt most natural to use?

Your Favorite?

Which technique gave you the best results?

Did Role-Play Make You Laugh?

Share your funniest moment!

Quick check from last session:

What are the 4 advanced techniques?

Warm-Up - Your Real Life

Think about **last Session**. What did you have to do?

Research

Party Planning

Writing

Finding Gifts

Making Decisions

Learning

☑ **AI can help with ALL of these.**

Your AI Toolkit

You have **4 main AI tools**. Each one is good for different things.

The skill: pick the **RIGHT tool** for the job.

Tool	Best for...
ChatGPT / Gemini	Most creative work, drafts, brainstorming
NotebookLM	Research with sources you trust
QuillBot	Fixing or improving your OWN writing
Storybook / Image tools	Creative pictures and stories

Creative Tasks 🎨

Best for: Stories, characters, drawings, jokes, gift ideas

AI is GREAT for:

- **Spitball Ideas When Stuck**
AI can generate dozens of creative directions in seconds - perfect when your brain feels empty.
- **Help You Start**
The hardest part of any creative project is the beginning. AI gives you a launchpad.
- **Suggest Different Styles**
Silly, serious, spooky, poetic - AI can explore any direction you want.

"You are a creative storyteller. Give me 3 fun ideas for a comic strip about a turtle who loves video games. Keep them short and silly."

🤖 Role-play + 📝 Format = great creative prompt!

Everyday Tasks

Best for: Planning, organizing, decision-making, checklists

AI is GREAT for:

Making To-Do Lists

Suggesting Packing Lists

Helping You Make Decisions

Example Prompt:

"Help me plan a sleepover for 4 friends. We have 4 hours. Make a simple schedule with snacks, games, and a movie.

Keep it kid-friendly."

Mini Activity 1 - Pick a Real Task!

Pick **ONE real thing** from your life this week and write a great prompt for it.

Get ideas for a creative project

Pick a movie or activity for family night

Make a packing list for a trip

Plan a birthday or Hangout

Make a study schedule

Find ideas for a gift

Research

Best for: Finding facts, comparing things, learning about topics

Big warning: AI can hallucinate. So for research, we use TWO tools together.

Where to Find Trusted Sources

Wikipedia

Good starting point -
but always check the
references at the
bottom!

Encyclopedia Britannica

Very reliable. Written
by experts and fact-
checked carefully.

National Geographic Kids

Great for animals and
nature topics. Fun
AND accurate

Research Example - The Smart Way

Imagine you need to research **penguins** for school. Here's the difference between the sketchy way and the smart way.

✗ The Sketchy Way

Ask ChatGPT about penguins

Copy what it says directly

Submit without checking

✓ The Smart Way - Step by Step

Ask ChatGPT for an overview

"Give me 5 main facts about penguins."

Open Wikipedia

Find the official Wikipedia article about penguins.

Upload to NotebookLM

Add the Wikipedia article as a verified source.

Ask NotebookLM the same question

Does its answer match what ChatGPT said?

Compare the results

They match → probably true!

They don't → dig deeper or trust NotebookLM.

✓ **Smart research = use AI + verify with sources.**

Learning

Best for: Studying, understanding hard concepts, practicing

Re-explain Things You Didn't Understand

Ask AI to explain a concept from class in a different way - simpler, with examples, or using an analogy.

Quiz-Style Practice

Have AI generate practice questions and test yourself before the real test.

Make Study Notes

Ask AI to summarize a chapter or topic into bullet points you can review quickly.

Break Down Hard Topics

Complex ideas become simple when you ask AI to explain them step by step.

"You are a friendly tutor. Explain fractions to a 5th grader using a pizza analogy. Then give me 3 practice problems. Don't show me the answers yet - I want to try first. Then I'll ask for the answers when I'm ready."

i Pro tip: Telling AI HOW to interact with you (like "don't show answers yet") is a real skill. AI follows your lead.

BUT - Don't Cheat Yourself!

There's a difference between **LEARNING** with AI and **CHEATING** with AI.

✓ Learning:

- "Explain this to me different ways."
- "Give me practice problems."
- "Help me understand the steps."
- "Check my work."

✗ Cheating:

- "Do my homework for me."
- "Write my essay so I can turn it in."
- "Give me the answers I'll copy."

⚠ **The test:** When YOU take the real test or learn a new topic - will YOU know it? Or only AI?

⚖ The Grey Areas

Brainstorm ideas, then write your own

Using AI to spark ideas for an essay, then writing it yourself → **Usually OK**

Check your grammar

Using AI to proofread and fix grammar mistakes → **Usually OK**

Explain a topic

Using AI to help you understand something confusing → **Usually OK**

Write a draft you'll heavily rewrite

Using AI to generate a starting draft → **Ask Your Teacher**

Writing ✍️

Best for: Drafting, fixing, polishing your OWN writing

💬 [ChatGPT / Gemini](#)

For generating **ideas and drafts** - great when you need a starting point or want to explore different angles.

✎ [QuillBot](#)

For **rewriting and polishing** your own words - refines your existing writing without replacing your voice.

- ✅ **Key idea:** YOU write first. AI helps **improve** what you wrote. You should still sound like YOU. AI is just the editor.

Meet QuillBot

QuillBot is an AI tool that helps you rewrite your own words - like having an editor who only suggests, never decides.

Write a Sentence Yourself

Start with YOUR own words and ideas - this is essential.

Paste It Into QuillBot

Drop your text into the QuillBot interface.

QuillBot Suggests Improvements

It offers paraphrasing, grammar fixes, and clearer phrasing options.

YOU Pick Which One to Use

You stay in control - choose the version that sounds most like you.

Paraphrasing

Say the same thing differently

Grammar Check

Fix mistakes automatically

Sound Better

Clearer, more polished writing

Mini Activity 2 - Match the Tool!

Match each task to the **BEST AI tool**. Think carefully - some tasks have more than one good option!

Task	Best Tool?
Brainstorm story ideas	?
Check facts for a research paper	?
Make my paragraph sound better	?
Help me draft an invitation	?
Study for a science test	?
Generate a fun picture for a birthday card	?
Find facts in a specific book or article	?

Options: ChatGPT / Gemini, NotebookLM, QuillBot, Storybook or Gemini Image

Mini Activity 2 - Answers

How did you do? **Smart AI users pick the right tool for the right job.**

Task	Best Tool
Brainstorm story ideas	 ChatGPT or Gemini
Check facts for research	 NotebookLM (with trusted sources)
Make paragraph sound better	 QuillBot
Help draft an invitation	 ChatGPT or Gemini
Study for science test	 ChatGPT or Gemini
Make a birthday card image	 Gemini Image or Storybook
Find facts in a book/article	 NotebookLM

Hands-On Activity - Real-Task Playground! 🎮

Remember the prompt you wrote in Mini Activity 1? **Time to USE it!**

1

Open the Tool

Launch ChatGPT, Gemini, NotebookLM, or your preferred AI assistant.

2

Type Your Prompt

Enter the prompt you crafted in Mini Activity 1 exactly as you wrote it.

3

Review the Answer

Read the response carefully. Does it address what you actually needed?

4

Iterate!

Refine and improve your prompt to get a better, more useful result.

5

Save to Library

Save the final version of your prompt to your personal Prompt Library.

Run Your Task

Together with your mentor, work through your real task step by step.

Real prompt engineers iterate **2–3 times** before they're satisfied.

Run your prompt

Submit it and see what comes back.

Look at the answer carefully

Read every part - don't just skim.

Ask: "Is this what I wanted?"

Be honest with yourself about whether it hit the mark.

If not - IMPROVE the prompt

Add more context, change the format, or be more specific.

Try again until you're happy

Iteration is the secret weapon of great prompt engineers.

Responsible AI Use - The Big Rules

While AI is awesome, here are the rules to use it RIGHT. These aren't just school rules - they're life skills.

Don't Cheat Yourself

Use AI to learn, not to skip learning. Your future self will thank you.

You Are the AUTHOR

Never copy-paste AI work and call it yours.
Your voice matters.

Be HONEST

When teachers or parents ask if you used AI, tell the truth.

Always VERIFY

Especially for school - check important facts with trusted sources.

Stay in CONTROL

You decide what's good and what's not. AI is your tool, not your boss.

✔ **AI is your tool. YOU are responsible for what you do with it.**

The Big Test - Is It Really YOURS?

Before you submit **ANY work** that used AI, ask yourself these four questions honestly.

Did I write the main ideas?

The core thinking should come from your own brain.

Do I understand everything in it?

If you can't explain it, you don't really own it.

Could I explain this if someone asked?

Imagine your teacher asking you to walk through it out loud.

Does this sound like ME?

Your unique voice should still shine through.

If YES to all 

Great! AI helped you do YOUR best work.

If NO 

It's not really yours. Time to do more YOURSELF.

What We Learned in this Session

You covered a lot of ground today. Here's everything you can now do with confidence.

5 Real-Life Uses for AI

Creative, Everyday, Research, Learning, Writing

4 Main Tools to Pick From

ChatGPT/Gemini, NotebookLM, QuillBot, Image tools

Smart Research Strategy

AI overview + verify with trusted sources

Learning vs. Cheating

Use AI to GROW, not to skip the work

Responsible AI Use

You're the author, always verify, stay in control

Prompt Library Updated

Added a real-life prompt from today's activity

✓ **You can now use AI for almost anything - responsibly.** 🎉

Your Homework - AI Helper Week

For the next **5 days**, use AI to help with ONE real task each day. Goal: use AI in REAL life, not just in our sessions. 

Day	Task	Tool Used	Did It Help?
Mon			
Tue			
Wed			
Thu			
Fri			

 Then add your **favorite prompt of the week** to your Prompt Library.

Challenge

Pick **ONE big task** - a project, an event, something tricky - and solve it using AI from start to finish.

This is what real "AI-augmented" work looks like.

Brainstorm

Use ChatGPT to generate ideas and directions

Research

Use NotebookLM to find and verify facts

Draft

Write your work using AI as a guide

Polish

Use QuillBot to refine and improve

Verify

Confirm it's all true and genuinely YOURS

Next Time: Session 14

AI That READS - Natural Language Processing (NLP)

You've used AI to talk, write, and create. But how does AI actually **understand words**? Next session, we open up that mystery.

How AI Reads Sentences

Discover how AI processes and parses language the way humans do

How It Figures Out Meaning

Learn how AI understands context, intent, and what you really mean

How It Translates Languages

Explore how AI bridges communication across different languages

How It Detects Emotion

See how AI can tell if something is happy, sad, angry, or sarcastic
