

Session 18: AI in Everyday Life & Across Industries

You've spent 17 sessions learning **HOW** AI works.

This Session, we ask: where does AI actually **SHOW UP** in the real world?

Objectives

By the end of this Session, you'll be able to:

01

Spot AI Everywhere

Identify AI in 5+ everyday things you do

03

Use the Recipe

Apply **Sense** → **Think** → **Act** to break down ANY AI system

02

Name the Industries

Describe how AI is used in at least 4 major industries

04

Humans in Charge

Understand why humans stay in charge in every industry

Recap & Homework

Welcome back! Let's see your **Multimodal Detective** work.

Where did you spot AI using multiple modalities?

Quick Check

 NLP Recipe

Break → Understand → Generate

 CV Recipe

See → Process → Act

 Voice AI Recipe

Hear → Process → Speak

 Multimodal AI

All of them combined!

Warm-Up - Count the AI You Used Today

Right now, think back to this week. How many AI moments did you have? 🤔

Did you...

Get a YouTube recommendation?
(AI)

See a Snapchat filter? **(AI)**

Get autocomplete on your phone?
(AI)

See a "trending" video? **(AI)**

Talk to Siri or Alexa? **(AI)**

Use Face Unlock? **(AI)**

AI in Your Everyday Life

Here are the most common AI moments in your day:

1

Wake Up

Alarm clock (some learn your schedule)

2

Phone

Autocorrect, Face Unlock, predicted text

3

School Ride

Google Maps suggesting routes

4

At School

Spell-check, search engines

5

Lunch Break

Algorithm-picked YouTube videos

6

After School

Game AI that adapts to your skill

7

Bedtime

Phone screen-time tracking learns YOUR habits and limits

Mini Activity 1 - YOUR Day with AI

Now do it for **YOURSELF**. In your head, walk through yesterday. List 5 moments where AI touched your life. For each one, use the **Sense → Think → Act** recipe:

AI Moment	 What did it SENSE?	 What did it THINK?	 What did it DO?
<i>Example: YouTube rec</i>	What videos I watched	"He might like this next"	Showed me a video
1.			
2.			
3.			
4.			
5.			

Mini Activity 1 – Answers

Here's how the **Sense** → **Think** → **Act** recipe plays out for common AI moments:

AI Moment	 SENSE	 THINK	 ACT
YouTube Recommendation	What videos you watched	"She might like this next"	Showed you a new video
Face Unlock	Your face on camera	"Does this match the saved face?"	Unlocked the phone
Autocorrect	The letters you typed	"Did they mean 'the' instead of 'teh'?"	Fixed the word
Google Maps	Live traffic data	"Which route is fastest right now?"	Showed the best path
Spotify Discover Weekly	Songs you've liked	"What other songs match this taste?"	Built you a custom playlist

Same Recipe, Different Jobs

Every AI you just listed follows the **SAME recipe: Sense → Think → Act**. Just the **JOB** changes.

AI	 Sense	 Think	 Act
YouTube rec	Watch history	Patterns	Suggest video
Face Unlock	Camera	Recognize face	Open phone
Maps	Live traffic	Calculate fastest	Show route
Game AI	Your moves	Predict your next	Make game harder

 One recipe. A million applications.

AI Goes WAY Beyond Your Phone

AI isn't just for apps. Real industries use it for **HUGE** jobs. Let's look at 5 industries where AI is changing things **RIGHT NOW**:

Healthcare

Saving lives

Finance

Protecting your money

Transportation

Getting people places

Entertainment

Movies, games, music

Education

Helping kids learn

AI in Healthcare

AI is helping doctors **save lives**. Real examples:

Spotting Cancer in X-rays

AI can sometimes see things even doctors miss

Discovering New Medicines

AI tests thousands of drug ideas in days, not years

Watching Patients

AI alerts nurses if someone's heart rate is dropping

Reading Dental Scans

Finds cavities faster than manual review

Sense → Think → Act

Sense:

Look at X-ray pixels (Computer Vision)

Think:

Spot the pattern of a tumor

Act:

Alert the doctor

  AI **HELPS** doctors. It doesn't **REPLACE** them. Doctors make the final call.

AI in Finance

AI protects your money — and your family's money.

Real examples:

Fraud Detection

AI watches every credit card swipe and spots unusual patterns instantly

Predicting Prices

AI helps banks analyze risk and decide which loans are safe to approve

Customer Service

AI-powered chatbots handle simple questions 24/7

Account Security

AI continuously monitors login activity and account behavior, detecting hackers

Sense → Think → Act

 **Sense:**

Every transaction your family makes

 **Think:**

"Does this match normal patterns?"

 **Act:**

Block it OR send a fraud alert

✓ Saves people's millions of dollars every year.

AI in Transportation 🚗

AI is changing how we get around. Real examples:

🚦 Self-Driving Cars

Tesla and Waymo use AI to see roads, signs, and pedestrians -navigating without a human driver.

🗺️ Google Maps

AI predicts traffic conditions in real time, rerouting millions of drivers every day.

🚌 Smart Traffic Lights

AI-powered signals adjust their timing based on actual traffic flow, reducing congestion and wait times.

✈️ Airplane Autopilot

Most of a commercial flight is handled by AI — not humans. Autopilot manages altitude, speed, and navigation.

Sense → Think → Act

🔍 Sense:

Cameras, radar, sensors

🧠 Think:

"What's ahead? Where can I go?"

🎬 Act:

Steer, brake, accelerate

⚠️ Humans are still required. Backup drivers, traffic engineers, pilots — all needed.

AI in Entertainment

AI is changing movies, games, music, and books. Real examples:

Movies:

AI was used to **de-age Harrison Ford by 40 years**

Games:

Fortnite uses AI to match you with players at **YOUR** skill level

Music

Spotify's "Discover Weekly"
- AI picked every single song just for you

Animation:

Adobe Firefly generates concept art and backgrounds in minutes, not days.

✓ Real humans are still the creators. AI is a **tool**. Humans tell the story.

AI in Education 🎓

AI is changing how kids learn. Real examples:

Personalized Tutors

Various AI tutors adapt to each student's pace

Auto-Grading

Short-answer essays graded by AI

Adaptive Learning

Apps that get harder as you improve (like Duolingo)

Practice Questions

Generated just for you based on your weak spots

Sense → Think → Act

Sense:

What answers you got right/wrong

Think:

"She's strong on multiplication, weak on fractions"

Act:

Give her more fraction practice

🕒 Real teachers are still essential. AI helps, but teachers know **YOU**.

Mini Activity 2 - AI Job Match!

Match each AI job to the right industry: Healthcare / Finance / Transportation / Education / Games / Entertainment

#	AI Job	Industry Options
1	Spots tumors in medical scans	
2	Blocks a stolen credit card transaction	
3	Helps a self-driving car stop at a red light	
4	Makes a personalized math practice quiz	
5	Generates a Discover Weekly playlist	
6	Predicts which video you'll watch next	
7	Creates a CGI dragon for a movie	

Mini Activity 2 - Answers

1. Spots Tumors

 Healthcare

2. Blocks Stolen Card

 Finance

3. Self-Driving Car Stop

 Transportation

4. Math Practice Quiz

 Education

5. Discover Weekly

 Entertainment

6. Predicts Next Video

 Entertainment

7. CGI Dragon

 Entertainment

Even More Industries Use AI 🌍

Just to blow your mind – AI is also in:

Farming

Drones check crops, AI predicts the best time to plant

Safety

AI helps spot dangers in security cameras

Space

NASA uses AI to find planets and analyze rovers' data

Climate

AI tracks ice melting, animal migration, pollution

But Wait - Should AI Do EVERYTHING? 🤔

Now the big question: just because AI **CAN** do something... should it?

❤️ Heart Transplants

Should AI decide who gets a heart transplant?

🚓 Criminal Justice

Should AI decide who goes to jail?

🎨 Art & Creativity

Should AI replace human artists?

👩‍🏫 Teaching

Should AI replace teachers?

🤖 Elections

Should AI run elections?

⊗ There are no easy answers. These are real conversations happening **RIGHT NOW**.

Humans need to stay in charge of decisions that affect people's lives.

The Big Rule - Humans Stay In Charge

Across **EVERY** industry, the same rule holds:

✅ AI HELPS humans

Saves lives, makes things faster, cheaper, easier

❌ AI REPLACES humans for important decisions

This is dangerous and must be avoided

Real Examples of the Rule

🏥 Healthcare

AI spots the tumor. The **DOCTOR** decides treatment.

🚗 Transportation

AI helps drive the car. The **HUMAN** is responsible.

🎓 Education

AI generates practice problems. The **TEACHER** guides learning.

🏦 Finance

AI flags suspicious activity. A **HUMAN** confirms before locking your account.

📌 This is called **Human-in-the-Loop**

Hands-On Activity

Industry Research

Time to be a real AI industry researcher.

Your task: Pick ONE industry you're curious about. We'll dig in together.

Search & Discover

Use **Google** or **NotebookLM** to find **2–3 ways AI is used** in your chosen Industry. Look for real examples that are already happening today.

Pick the COOLEST Example

Choose the one example that excites you most. The one that makes you think: *"Wow, I didn't know AI could do that!"*

Break It Down

Use the **Sense** → **Think** → **Act** framework to analyze your chosen example in depth. Fill in every row of the table on the next card.

Hands-On Activity - Step by Step

We'll follow these steps:

Step	Your Answer
What does the AI SENSE?	
What does it THINK about?	
What does it DO?	
Who does it help?	
What could go wrong?	

Share What You Found 🎉

Walk through what you found:

🤔 What surprised you?

Was there something about AI in this industry you didn't expect?

🤔 How does AI help people in this industry?

What real benefit does it provide to workers or customers?

🤔 What if the AI made a mistake - what could happen?

Think about the stakes. Is this a low-risk or high-risk AI?

✅ You just did **real AI research** using all the skills you've learned. 🎉

What We Learned in this Session

AI is EVERYWHERE

10–30 AI touches per day for most kids — in everyday life

Same Recipe

Sense → Think → Act in every single AI system

Industries

Healthcare, Finance, Transportation, Entertainment, Education , etc

Humans Stay In Charge

Human-in-the-Loop for all big decisions

Real Research

You researched YOUR favorite industry using real AI tools

AI isn't future tech. It's NOW. And it's in YOUR life - and every industry.

Your Homework - AI Industry Spotter 🏠

Pick ONE adult in your life - a parent, family member, neighbor, anyone. Ask them: **"Does your job use AI in any way?"**

Their answer might be YES (and surprising!) or NO. Either way - find out.

Adult	Their Job	Do they use AI?	How? (or why not?)

☐ Could AI help them MORE in the future? How?

Next Time - Session 19:

AI Careers & The Future of Work

You've seen AI in every industry. So what does that mean for **JOBS**?

Will AI take jobs - or create new ones?

The 4 career lanes: Builders, Deciders, Guardians & Empowered

The 5 skills that matter most in an AI-powered world

Build your own real app - no coding needed!
